I am a store owner here in Istanbul. Since I started using Swift Logistics to sending products to my customers around the globe, I almost never had an issue with package delivery.

I always had issues with the pervious courier services I used until a friend introduced me to Swift logistics. I was amazed with how quick and efficient their services is. Try it today.

NEWS LATTERS

This is a logistic site for service delivery that am suppose to do for a friend but I will pay you out of my pocket to help edit it. The main feature is the tracking code entry at the top of the site that will display package information on entering the right code. a page that will calculate quote for customers (see page 3)with user registration and login. I will provide the pictures and a logo in their correct sizes. I don't mind you can change the colors on the site to something better.

The calculation for the quote should only be in consideration of the weight and location only. Other factors like height, width and length should be ignored. The minimum cost for a product no matter how small should be \$200 for a thresh hold of 30lbs with an addition of \$1 for every 3lbs . Any location within Europe and Asia will carry a flat fee of \$50 and any location outside that should cost a flat fee of \$150. hope you get this.

After entering the right tracking code, the page that pops up should be like this (see next page).

At least this is enough to start the work. Let me know what you think.
